

**OPTiM Corporation Joins Epson America
“Moverio Solution Provider” Program**
OPTiM is first Japanese corporation to be a Moverio solution provider in USA

TOKYO, Japan (April 22, 2019) - OPTiM Corporation (TSE: 3694), a leading provider of platform solutions utilizing AI, IoT and big data, today announced it is the first Japanese company*¹ to join the Epson America, Inc.*² Moverio® Solution Provider program.

OPTiM will make its smart glass remote work support service, "Optimal Second Sight," and onsite management support service, "Smart Field," integrating Moverio smart glasses available worldwide. The goal is to expand relationships with new customers through these initiatives. Epson has a variety of both tethered and non-tethered Moverio smart glasses available for consumers, business and enterprise applications, delivering high quality, cost-effective solutions for hands-free AR experiences.

“Epson first announced Moverio smart glasses in 2011 and has since continued to drive market expansion with ongoing iterations featuring technological advancements to further the wearables industry,” said Eric Mizufuka, product manager, augmented reality solutions, Epson America. “We are delighted to have OPTiM join the expanding ecosystem of partners developing productivity enhancing solutions like Optimal Second Sight using the Epson Moverio smart glasses.”

■ About the Moverio Solution Provider Program

The Epson Moverio Solution Provider program provides customers with a diverse ecosystem of solution providers using augmented reality to solve problems, connect people, and change the way we experience the world.

■ About “Optimal Second Sight”

Optimal Second Sight is a solution for live video to be shared through a smart glass, smartphone, or tablet, along with features that allow remote support to be given from anywhere. A remote operator can review a site's status in real-time from an on-site worker's point of view and provide detailed support. Optimal Second Sight solves common workplace problems, including being unable to give comprehensive remote support because the work site is not visible through phone or email communication, or the high costs of going to distant work sites to give support in person.

This service realizes "Remote Experience Sharing," OPTiM's vision of users remotely sharing experience (knowledge, know-how, information) with others in real-time. Furthermore, Optimal Second Sight is available packaged with OPTiM's Remote Action smart glass.

■ About “Smart Field”

Smart Field is the field management support service, which revolutionizes the field with IoT, uses remote devices such as smart glasses, smart phones, and IoT devices to perform remote work support, task recording, task management, position information management, etc. A service that can support on-site work in an integrated manner by AI analysis.
